

5 RBQM Mistakes That Could Sink Your Trial

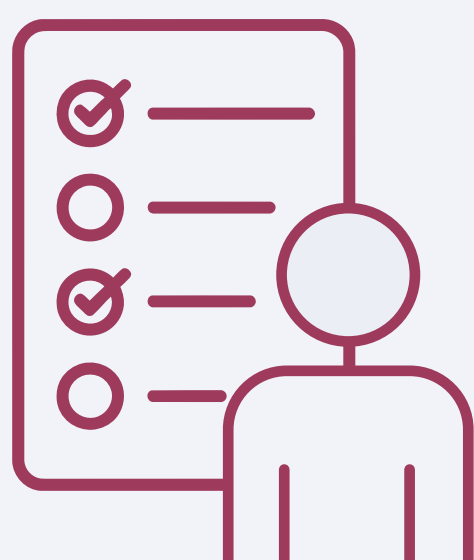

And how to fix them

Only

57%

of trials fully apply RBQM Principles*

*ACRO 2025

Delaying Risk Assessment

Mistake: Waiting until the trial starts.

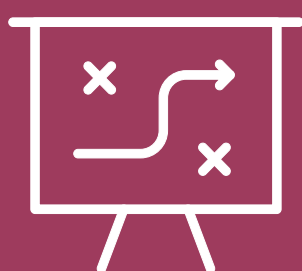

Fix: Start during protocol development to prevent costly amendments

No Real-Time Monitoring

Mistake: Relying on manual reviews.

Fix: Spot issues early with centralized monitoring.

Treating Every Site the Same

Mistake: Uniform oversight across all sites.

Fix: Tailor monitoring based on site risk.

Neglecting Staff Training

Mistake: Teams lack RBQM understanding.

Fix: Equip teams with structured training.

Using Generic Tools

Mistake: Spreadsheets slow decisions.

Fix: Use purpose-built RBQM platforms.

OPRA is the RBQM Standard

Purpose-Built to meet ICH E6 (R3) standards

Delivers instant insights and automated alerts

Proven across global trials, ensuring teams stay audit-ready
