Feature/Function

Verdict

Reasoning

Risk
Assessment &
Management

TIE

Both support structured risk identification and ongoing oversight.

Integration

TIE

Both systems connect with EDC, CTMS, and eClinical systems.

Risk Scoring

OPRA
RAM

RACT: Category-based scoring and thresholds.
RAM: Hierarchical scoring using linked risk variables.

Dashboard &
Visualization

OPRA
RAM

RACT: Static or threshold-based risk views.
RAM: Configurable dashboards with real-time signals.

Regulatory
Compliance

OPRA
RAM

RACT: Documents RBQM decisions and risk rationale.
RAM: Configurable audit trails for ICH and 21 CFR Part 11.

Collaboration

TIE

Both platforms offer centralized risk review across cross-functional teams.

Real-Time
Insights

OPRA
RAM

RACT: Periodic review against defined thresholds.
RAM: Continuous visibility as operational data changes.

Study-Specific
Configurability

OPRA
RAM

RACT: Standardized categories for consistency.
RAM: Configurable to protocol-specific risks.

Efficiency
Tools

OPRA
RAM

RACT: Manual risk tracking and updates.
RAM: Automated risk management workflows.

Market Usage

OPRA
RAM

RACT: Framework-driven approach.
RAM: Dedicated system used across 450+ trials.
